PowerShell Get-Help on command 'Set-Culture'

PS C:\Users\wahid> Get-Help Set-Culture

NAME

Set-Culture

SYNOPSIS

Sets the user culture for the current user account.

SYNTAX

Set-Culture [-CultureInfo] <CultureInfo> [<CommonParameters>]

DESCRIPTION

The Set-Culture cmdlet sets a specific culture for the current user account. A

culture is known as a locale for unmanaged code development. The information

includes the names for the culture, the writing system, the calendar, and

formatting for dates and sort strings. For more information, see CultureInfo

Class (https://go.microsoft.com/fwlink/?LinkID=242306) and [Configurable

Language and Cultural

Settings](https://go.microsoft.com/fwlink/?LinkID=242307).

PARAMETERS

    -CultureInfo <CultureInfo>

        Specifies a culture.

    <CommonParameters>

        This cmdlet supports the common parameters: Verbose, Debug,

        ErrorAction, ErrorVariable, WarningAction, WarningVariable,

        OutBuffer, PipelineVariable, and OutVariable. For more information, see

        about_CommonParameters (https:/go.microsoft.com/fwlink/?LinkID=113216).

    ------------------ Example 1: Set the culture ------------------

    PS C:\> Set-Culture -CultureInfo de-DE

    This command sets the culture for the current user account to German (Germany).
