PowerShell Get-Help on command 'Set-WinLanguageBarOption'

PS C:\Users\wahid> Get-Help Set-WinLanguageBarOption

NAME

Set-WinLanguageBarOption

SYNOPSIS

Sets the language bar type and mode for the current user account.

SYNTAX

```
Set-WinLanguageBarOption [-UseLegacyLanguageBar] [-UseLegacySwitchMode]  
[<CommonParameters>]
```

DESCRIPTION

The Set-WinLanguageBarOption cmdlet sets the language bar type and mode by using a LanguageBar object. The values for the type and mode settings can be either true or false. The default value for each setting is false.

PARAMETERS

-UseLegacyLanguageBar [<SwitchParameter>]

Indicates that this cmdlet sets the language bar mode to the legacy

setting. If you do not specify this parameter, the cmdlet sets the language bar mode to the default setting.

`-UseLegacySwitchMode [<SwitchParameter>]`

Indicates that this cmdlet sets the language bar switch mode to the legacy or per-thread setting. If you do not specify this parameter, the cmdlet sets the language bar switch mode to the default or per-user setting.

`<CommonParameters>`

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see `about_CommonParameters` (<https://go.microsoft.com/fwlink/?LinkID=113216>).

----- Example 1: Set language bar options -----

```
PS C:\> Set-WinLanguageBarOption -UseLegacySwitchMode -UseLegacyLanguageBar
```

This command sets the language bar mode to the legacy setting and the language bar type to the per-thread setting.

---- Example 2: Set language bar options to default values ----

```
PS C:\> Set-WinLanguageBarOption
```

This command sets the language bar mode and the language bar type to the default setting.
