### ***PowerShell Get-Help on command 'Start-DtcDiagnosticResourceManager'***

***PS C:\Users\wahid> Get-Help Start-DtcDiagnosticResourceManager***

#### NAME

Start-DtcDiagnosticResourceManager

#### SYNOPSIS

Starts a diagnostic Resource Manager.

#### SYNTAX

```
Start-DtcDiagnosticResourceManager [[-Port] <Int32>] [[-Name] <String>]  
[<CommonParameters>]
```

#### DESCRIPTION

The Start-DtcDiagnosticResourceManager cmdlet starts a diagnostic Resource Manager (RM) as a Windows PowerShell background job.

#### PARAMETERS

-Name <String>

Specifies the name for the diagnostic resource manager to start. You can later refer to the RM by using this name. If you do not specify a name,

the RM instance ID, a GUID, is always assigned to the RM and you can refer to it by that ID.

`-Port <Int32>`

Specifies the listening port of the test RM.

`<CommonParameters>`

This cmdlet supports the common parameters: Verbose, Debug, ErrorAction, ErrorVariable, WarningAction, WarningVariable, OutBuffer, PipelineVariable, and OutVariable. For more information, see `about_CommonParameters` (<https://go.microsoft.com/fwlink/?LinkID=113216>).

----- Example 1: Start a diagnostic resource manager -----

```
PS C:\> Start-DtcDiagnosticResourceManager -Port 17124 -Name "testRM"
```

This example starts a DTC diagnostic resource manager.

#### REMARKS

To see the examples, type: `"get-help Start-DtcDiagnosticResourceManager -examples"`.

For more information, type: `"get-help Start-DtcDiagnosticResourceManager -detailed"`.

For technical information, type: `"get-help Start-DtcDiagnosticResourceManager -full"`.

For online help, type: `"get-help Start-DtcDiagnosticResourceManager -online"`
