Red Hat Enterprise Linux Release 9.2 Manual Pages on 'buildah-source-create.1' command

\$ man buildah-source-create.1

buildah-source-create(1) General Commands Manual buildah-source-create(1)

NAME

buildah-source-create - Create and initialize a source image

SYNOPSIS

buildah source create [options] path

DESCRIPTION

Create and initialize a source image. A source image is an OCI artifact; an OCI image with a custom config media type.

Note that the buildah-source command and all its subcommands are experimental and may be subject to future changes

OPTIONS

--author author

Set the author of the source image mentioned in the config. By default, no author is set.

--time-stamp bool-value

Set the created time stamp in the image config. By default, the time stamp is set.
