Red Hat Enterprise Linux Release 9.2 Manual Pages on 'bundle-inject.1' command

$ man bundle-inject.1

BUNDLE-INJECT(1)   BUNDLE-INJECT(1)

NAME

    bundle-inject - Add named gem(s) with version requirements to Gemfile

SYNOPSIS

    bundle inject [GEM] [VERSION]

DESCRIPTION

    Adds the named gem(s) with their version requirements to the resolved

    [Gemfile(5)][Gemfile(5)].

    This command will add the gem to both your [Gemfile(5)][Gemfile(5)] and

    Gemfile.lock if it isn?t listed yet.

    Example:

      bundle install

      bundle inject ?rack? ?> 0?

    This will inject the ?rack? gem with a version greater than 0 in your

    [Gemfile(5)][Gemfile(5)] and Gemfile.lock

          December 2021   BUNDLE-INJECT(1)
