## ***Red Hat Enterprise Linux Release 9.2 Manual Pages on 'bundle-list.1' command***

***\$ man bundle-list.1***

BUNDLE-LIST(1) BUNDLE-LIST(1)

### NAME

bundle-list - List all the gems in the bundle

### SYNOPSIS

```
bundle list [--name-only] [--paths] [--without-group=GROUP[ GROUP...]]
[--only-group=GROUP[ GROUP...]]
```

### DESCRIPTION

Prints a list of all the gems in the bundle including their version.

Example:

```
bundle list --name-only
```

```
bundle list --paths
```

```
bundle list --without-group test
```

```
bundle list --only-group dev
```

```
bundle list --only-group dev test --paths
```

## OPTIONS

`--name-only`

Print only the name of each gem.

`--paths`

Print the path to each gem in the bundle.

`--without-group=<list>`

A space-separated list of groups of gems to skip during printing.

`--only-group=<list>`

A space-separated list of groups of gems to print.
