Red Hat Enterprise Linux Release 9.2 Manual Pages on 'bundle-show.1' command

$ man bundle-show.1

BUNDLE-SHOW(1)   BUNDLE-SHOW(1)

NAME

    bundle-show - Shows all the gems in your bundle, or the path to a gem

SYNOPSIS

    bundle show [GEM] [--paths]

DESCRIPTION

    Without the [GEM] option, show will print a list of the names and ver?

    sions of all gems that are required by your [Gemfile(5)][Gemfile(5)],

    sorted by name.

    Calling show with [GEM] will list the exact location of that gem on

    your machine.

OPTIONS

    --paths

        List the paths of all gems that are required by your [Gem?

        file(5)][Gemfile(5)], sorted by gem name.

            December 2021   BUNDLE-SHOW(1)
