

Red Hat Enterprise Linux Release 9.2 Manual Pages on 'bundle-viz.1' command

\$ man bundle-viz.1

BUNDLE-VIZ(1) BUNDLE-VIZ(1)

NAME

bundle-viz - Generates a visual dependency graph for your Gemfile

SYNOPSIS

```
bundle viz [--file=FILE] [--format=FORMAT] [--requirements] [--version]
[--without=GROUP GROUP]
```

DESCRIPTION

viz generates a PNG file of the current Gemfile(5) as a dependency graph. viz requires the ruby-graphviz gem (and its dependencies).

The associated gems must also be installed via bundle install(1) bundle-install.1.html.

OPTIONS

--file, -f

The name to use for the generated file. See --format option

--format, -F

This is output format option. Supported format is png, jpg, svg, dot ...

--requirements, -R

Set to show the version of each required dependency.

--version, -v

Set to show each gem version.

--without, -W

Exclude gems that are part of the specified named group.
