Red Hat Enterprise Linux Release 9.2 Manual Pages on 'cancel-cups.1' command

$ man cancel-cups.1

cancel(1)   OpenPrinting   cancel(1)

NAME

    cancel - cancel jobs

SYNOPSIS

    cancel [-h hostname[:port]] [-E] [-U username] [-a] [-u user?

    name] [-x] [id] [destination] [destination-id]

DESCRIPTION

    The cancel command cancels print jobs. If no destination or id is

    specified, the currently printing job on the default destination is

    canceled.

OPTIONS

    The following options are recognized by cancel:

    -a   Cancel all jobs on the named destination, or all jobs on all des?

        tinations if none is provided.

    -E   Forces encryption when connecting to the server.

    -h hostname[:port]

        Specifies an alternate server. Note: This option must occur be?

        fore all others.

    -U username

        Specifies the username to use when connecting to the server.

    -u username

        Cancels jobs owned by username.

    -x   Deletes job data files in addition to canceling.

CONFORMING TO

Unlike the System V printing system, CUPS allows printer names to contain any printable character except SPACE, TAB, "/", or "#". Also, printer and class names are not case-sensitive.

EXAMPLES

Cancel the current print job:

    cancel

Cancel job "myprinter-42":

    cancel myprinter-42

Cancel all jobs:

    cancel -a

NOTES

Administrators wishing to prevent unauthorized cancellation of jobs via the -u option should require authentication for Cancel-Jobs operations in cupsd.conf(5).
