Red Hat Enterprise Linux Release 9.2 Manual Pages on 'clevis-decrypt.1' command

$ man clevis-decrypt.1

CLEVIS-DECRYPT(1)   CLEVIS-DECRYPT(1)

NAME

    clevis-decrypt - Decrypts using the policy defined at encryption time

SYNOPSIS

    clevis decrypt CONFIG < JWE > PT

OVERVIEW

    The clevis decrypt command decrypts data using the policy defined at

    encryption time. The specific decryption pin is inferred during

    decryption. There are no parameters.
