$ man config-util.5

SYSTEM-AUTH(5)   Linux-PAM Manual   SYSTEM-AUTH(5)

NAME

    config-util - Common PAM configuration file for configuration utilities

SYNOPSIS

    /etc/pam.d/config-util

DESCRIPTION

    The purpose of this configuration file is to provide common configura?

    tion file for all configuration utilities which must be run from the

    supervisor account and use the userhelper wrapper application.

    The config-util configuration file is included from all individual con?

    figuration files of such utilities with the help of the include direc?

    tive.   There are not usually any other modules in the individual con?

    figuration files of these utilities.

    It is possible for example to modify duration of the validity of the

    authentication timestamp there. See pam_timestamp(8) for details.

BUGS

    None known.
