## Red Hat Enterprise Linux Release 9.2 Manual Pages on 'cons.saver.8' command

**$ man cons.saver.8**

cons.saver(8)               User Manuals               cons.saver(8)

NAME

    cons.saver  -  general-purpose  Linux  console  screen save and restore

    server

SYNOPSIS

    cons.saver TTY

DESCRIPTION

    Invoke this helper program with the Ctrl-o key combination to save  and

    restore the user session on the screen.

OPTIONS

    cons.saver  takes only one argument, the TTY NAME from which the system

    will save and restore.

SECURITY

    Cons.saver does not need to be invoked by root.  It only needs read and

    write  access  to  /dev/vcsa*,  which  is a priviledged operation.  You

    should create an unprivileged user,  make  cons.saver  setuid  to  that

    user, and assure that all the vcsa* are owned by that user too.
