## ***Red Hat Enterprise Linux Release 9.2 Manual Pages on 'delpart.8' command***

### ***\$ man delpart.8***

DELPART(8)                    System Administration                    DELPART(8)

#### NAME

delpart - tell the kernel to forget about a partition

#### SYNOPSIS

delpart device partition

#### DESCRIPTION

delpart asks the Linux kernel to forget about the specified partition (a number) on the specified device. The command is a simple wrapper around the "del partition" ioctl.

This command doesn't manipulate partitions on a block device.

#### SEE ALSO

addpart(8), fdisk(8), parted(8), partprobe(8), partx(8)

#### REPORTING BUGS

For bug reports, use the issue tracker at <https://github.com/karelzak/util-linux/issues>.

#### AVAILABILITY

The delpart command is part of the util-linux package which can be downloaded from Linux Kernel Archive [<https://www.kernel.org/pub/linux/utils/util-linux/>](https://www.kernel.org/pub/linux/utils/util-linux/).
