## **Red Hat Enterprise Linux Release 9.2 Manual Pages on 'fc-validate.1' command**

**\$ man fc-validate.1**

FC-VALIDATE(1) FC-VALIDATE(1)

### NAME

fc-validate - validate font files

### SYNOPSIS

fc-validate [ -Vhv ]

[ [ -i index ] [ --index index ] ] [ [ -l lang ] [ --lang lang ]

] [ --verbose ] [ --version ] [ --help ] font-file...

### DESCRIPTION

fc-validate validates font-file(s) if each fonts satisfies the language coverage according to the orthography files in fontconfig. If --index is given, only one face of each file is validated, otherwise all faces are validated.

### OPTIONS

This program follows the usual GNU command line syntax, with long options starting with two dashes ('-'). A summary of options is included below.

- i Only query face indexed index of each file.
- l Set lang as a language instead of current locale. this is used for -m.
- v Show more detailed information.
- V Show version of the program and exit.
- h Show summary of options.

font-file

Query font-file for font faces.

#### RETURN CODES

fc-validate returns error code 0 for successful parsing, or 1 if any errors occurred or if at least one font face could not be opened.
