## ***Red Hat Enterprise Linux Release 9.2 Manual Pages on 'fwupdtool.1' command***

### ***\$ man fwupdtool.1***

man(1) fwupdtool man page man(1)

#### NAME

fwupdtool - standalone firmware update utility

#### SYNOPSIS

fwupdtool [CMD]

#### DESCRIPTION

This tool allows an administrator to use fwupd plugins directly without using the daemon process.

Additionally fwupdtool can be used to convert firmware from various different formats, or to modify the images contained inside the container firmware file. For example, you can convert DFU or Intel HEX firmware into the vendor-specific format.

#### OPTIONS

The fwupdtool command takes various options depending on the action.

Run fwupdtool --help for the full list. Note that some runtimes failures can be ignored using --force.

#### EXIT STATUS

Commands that successfully execute will return "0", but commands that have no actions but successfully execute will return "2".

#### SEE ALSO

fwupdagent(1), fwupdmgr(1)

#### BUGS

No known bugs.
