

Red Hat Enterprise Linux Release 9.2 Manual Pages on 'gnome-session-quit.1' command

\$ man gnome-session-quit.1

GNOME-SESSION-QUIT(1) General Commands Manual GNOME-SESSION-QUIT(1)

NAME

gnome-session-quit - End the current GNOME session

SYNOPSIS

gnome-session-quit [--logout|--power-off|--reboot] [--force] [--no-prompt]

DESCRIPTION

The gnome-session-quit program can be used to end a GNOME session.

OPTIONS

The following options are supported:

--logout

Prompt the user to confirm logout. This is the default behavior.

--power-off

Prompt the user to confirm system power off.

--reboot

Prompt the user to confirm system reboot.

--force

Ignore any inhibitors.

--no-prompt

End the session without user interaction. This only works with

--logout.

BUGS

If you find bugs in the gnome-session-quit program, please report these

on <https://bugzilla.gnome.org>.
