$ man install-info.1

INSTALL-INFO(1)   User Commands   INSTALL-INFO(1)

NAME

    install-info - update info/dir entries

SYNOPSIS

    install-info [OPTION]... [INFO-FILE [DIR-FILE]]

DESCRIPTION

    Add or remove entries in INFO-FILE from the Info directory DIR-FILE.

    INFO-FILE and DIR-FILE are required unless the --info-file or

    --dir-file (or --info-dir) options are given, respectively.

OPTIONS

    --add-once

        add only to first matching section, not all.

    --align=COL

        start description of new entries at column COL.

    --calign=COL

        format second and subsequent description lines to start at col?

        umn COL.

    --debug

        report what is being done.

    --delete

        delete existing entries for INFO-FILE from DIR-FILE; don't in?

        sert any new entries.

    --defsection=TEXT

like --section, but only use TEXT if no sections are present in

INFO-FILE (replacing "Miscellaneous").

--description=TEXT

the description of the entry is TEXT; used with the --name op?

tion to become synonymous with the --entry option.

--dir-file=NAME

specify file name of Info directory file; equivalent to using

the DIR-FILE argument.

--dry-run

same as --test.

--entry=TEXT

insert TEXT as an Info directory entry, overriding any corre?

sponding entry from DIR-FILE. TEXT is written as an Info menu

item line followed

by zero or more extra lines starting with whitespace.

If you specify more than one entry, all are added. If you don't

specify any entries, they are determined

from information in the Info file itself.

--help display this help and exit.

--info-dir=DIR

same as --dir-file=DIR/dir.

--info-file=FILE

specify Info file to install in the directory; equivalent to us?

ing the INFO-FILE argument.

--item=TEXT

same as --entry=TEXT.

--keep-old

do not replace entries, or remove empty sections.

--maxwidth, --max-width=COL

wrap description at column COL.

--menuentry=TEXT

same as --name=TEXT.

--name=TEXT

the name of the entry is TEXT; used with --description to become

synonymous with the --entry option.

--no-indent

do not format new entries in the DIR file.

--quiet

suppress warnings.

--regex=R

put this file's entries in all sections that match the regular

expression R (ignoring case).

--remove

same as --delete.

--remove-exactly

only remove if the info file name matches exactly; suffixes such

as .info and .gz are not ignored.

--section=SEC

put entries in section SEC of the directory. If you specify

more than one section, all the entries

are added in each of the sections.

If you don't specify any sections, they are determined

from information in the Info file itself;

if nothing is available there, the --defsection value is used;

if that is not specified, the final default is "Miscellaneous".

--section R SEC

equivalent to --regex=R --section=SEC --add-once.

--silent

suppress warnings.

--test suppress updating of DIR-FILE.

--version

display version information and exit.

REPORTING BUGS

Email bug reports to bug-texinfo@gnu.org, general questions and discus?

sion to help-texinfo@gnu.org.
