Red Hat Enterprise Linux Release 9.2 Manual Pages on 'lchfn.1' command

$ man lchfn.1

lchfn(1)   General Commands Manual   lchfn(1)

NAME

    lchfn - Change finger information

SYNOPSIS

    lchfn [OPTION]... [user]

DESCRIPTION

    Displays and allows changing information about user that is available

    using the finger(1) command (usually stored in the "gecos" field of

    /etc/passwd).

    If the user argument is not provided, username of the invoking user is

    used; the user argument is ignored if lchfn is run set-uid to a differ?

    ent user.

    Entering an empty string (by pressing Enter) at a prompt is interpreted

    as accepting a default value; to erase an attribute (or to use an empty

    string as the attribute value), enter a single dot character.

OPTIONS

    -i, --interactive

        Ask all questions when connecting to the user database, even if

        default answers are set up in libuser configuration.

EXIT STATUS

    The exit status is 0 on success, 1 on error.

libuser   Sep 20 2004   lchfn(1)
