## **Red Hat Enterprise Linux Release 9.2 Manual Pages on 'lgroupadd.1' command**

### **\$ man lgroupadd.1**

lgroupadd(1)            General Commands Manual            lgroupadd(1)

#### NAME

lgroupadd - Add an user group

#### SYNOPSIS

lgroupadd [OPTION]... group

#### DESCRIPTION

Adds a new user group with name group.

#### OPTIONS

-g, --gid=gid

Use group ID gid for the newly created group. A group ID is selected automatically if this option is not present.

-i, --interactive

Ask all questions when connecting to the user database, even if default answers are set up in libuser configuration.

-r, --reserved

The group is a system group. Groups that are not marked as system groups usually have automatically selected group IDs above a certain value (configured as LU\_GIDNUMBER in libuser.conf(5)).

This information is also passed to the libuser backends.

#### EXIT STATUS

The exit status is 0 on success, nonzero on error.
