$ man libwacom-list-devices.1

libwacom-list-devices(1)   General Commands Manual   libwacom-list-devices(1)

NAME

libwacom-list-devices - utility to list supported tablet devices

SYNOPSIS

libwacom-list-devices [--format=yaml|datafile]

DESCRIPTION

libwacom-list-devices is a debug utility to list all supported tablet

devices identified by libwacom. It is usually used to check whether a

libwacom installation is correct after adding custom data files.

OPTIONS

--format=yaml|datafile

Sets the output format to be used. If yaml, the output format

is YAML comprising the bus type, vendor and product ID and the

device name. If datafile, the output format matches the tablet

data files. The default is yaml.
