Red Hat Enterprise Linux Release 9.2 Manual Pages on 'lsattr.1' command

\$ man lsattr.1

LSATTR(1) General Commands Manual LSATTR(1)

NAME

lsattr - list file attributes on a Linux second extended file system

SYNOPSIS

lsattr [-RVadlpv] [files...]

DESCRIPTION

lsattr lists the file attributes on a second extended file system. See `chattr(1)` for a description of the attributes and what they mean.

OPTIONS

- R Recursively list attributes of directories and their contents.
- V Display the program version.
- a List all files in directories, including files that start with `\.`.
- d List directories like other files, rather than listing their contents.
- l Print the options using long names instead of single character abbreviations.
- p List the file's project number.
- v List the file's version/generation number.

AUTHOR

lsattr was written by Remy Card <Remy.Card@linux.org>. It is currently being maintained by Theodore Ts'o <tytso@alum.mit.edu>.

BUGS

There are none :-).

AVAILABILITY

lsattr is part of the e2fsprogs package and is available from
<http://e2fsprogs.sourceforge.net>.
