Red Hat Enterprise Linux Release 9.2 Manual Pages on 'msgcomm.1' command

$ man msgcomm.1

MSGCOMM(1)   User Commands   MSGCOMM(1)

NAME

    msgcomm - match two message catalogs

SYNOPSIS

    msgcomm [OPTION] [INPUTFILE]...

DESCRIPTION

    Find messages which are common to two or more of the specified PO

    files. By using the --more-than option, greater commonality may be re?

    quested before messages are printed. Conversely, the --less-than op?

    tion may be used to specify less commonality before messages are

    printed (i.e.   --less-than=2 will only print the unique messages).

    Translations, comments and extracted comments will be preserved, but

    only from the first PO file to define them. File positions from all PO

    files will be cumulated.

    Mandatory arguments to long options are mandatory for short options

    too.

  Input file location:

    INPUTFILE ...

        input files

    -f, --files-from=FILE

        get list of input files from FILE

    -D, --directory=DIRECTORY

        add DIRECTORY to list for input files search

If input file is -, standard input is read.

Output file location:

  -o, --output-file=FILE

      write output to specified file

  The results are written to standard output if no output file is speci?

  fied or if it is -.

Message selection:

  -<, --less-than=NUMBER

      print messages with less than this many definitions, defaults to

      infinite if not set

  ->, --more-than=NUMBER

      print messages with more than this many definitions, defaults to

      1 if not set

  -u, --unique

      shorthand for --less-than=2, requests that only unique messages

      be printed

Input file syntax:

  -P, --properties-input

      input files are in Java .properties syntax

  --stringtable-input

      input files are in NeXTstep/GNUstep .strings syntax

Output details:

  --color

      use colors and other text attributes always

  --color=WHEN

      use colors and other text attributes if WHEN. WHEN may be 'al?

      ways', 'never', 'auto', or 'html'.

  --style=STYLEFILE

      specify CSS style rule file for --color

  -e, --no-escape

      do not use C escapes in output (default)

  -E, --escape

      use C escapes in output, no extended chars

--force-po

    write PO file even if empty

-i, --indent

    write the .po file using indented style

--no-location

    do not write '#: filename:line' lines

-n, --add-location

    generate '#: filename:line' lines (default)

--strict

    write out strict Uniforum conforming .po file

-p, --properties-output

    write out a Java .properties file

--stringtable-output

    write out a NeXTstep/GNUstep .strings file

-w, --width=NUMBER

    set output page width

--no-wrap

    do not break long message lines, longer than the output page

    width, into several lines

-s, --sort-output

    generate sorted output

-F, --sort-by-file

    sort output by file location

--omit-header

    don't write header with 'msgid ""' entry

Informative output:

-h, --help

    display this help and exit

-V, --version

    output version information and exit
