NAME

Run Software - helper tool

SYNOPSIS

nautilus-autorun-software mount-uri

DESCRIPTION

nautilus-autorun-software is a helper tool for the GNOME desktop to

start software from media with Autostart files.

It is the default "x-content/unix-software" handler for the GNOME desk?

top.

SEE ALSO

Autostart files are described at https://specifications.freedesk?

top.org/autostart-spec/autostart-spec-latest.html
