Red Hat Enterprise Linux Release 9.2 Manual Pages on 'nl-classid-lookup.8' command

$ man nl-classid-lookup.8

nl-classid-lookup(8)   System Manager's Manual   nl-classid-lookup(8)

NAME

   nl-classid-lookup - Lookup classid definitions

SYNOPSIS

   nl-classid-lookup [-hv] [-r] [--raw] name

DESCRIPTION

   nl-classid-lookup searches the classid database for a matching entry.

   It is used to resolve qdisc/class names to classid values and vice

   versa.

OPTIONS

   -h or --help

      Print help text to console and exit.

   -v or --version

      Print versioning information to console and exit.

   -r or --reverse

      Do a reverse lookup. Lookup a classid and print its name.

--raw Print the raw classid in hexadecimal format, do not pretty print
it.

USAGE

Resolve the qdisc/class name "interactive":

```
# nl-classid-lookup interactive
```

Lookup the name of classid 1:2:

```
# nl-classid-lookup -r 1:2
```

FILES

/etc/libnl/classid
