Red Hat Enterprise Linux Release 9.2 Manual Pages on 'npm-shrinkwrap.1' command

$ man npm-shrinkwrap.1

NPM-SHRINKWRAP(1)   NPM-SHRINKWRAP(1)

NAME

   npm-shrinkwrap - Lock down dependency versions for publication

Synopsis

   npm shrinkwrap

   Note: This command is unaware of workspaces.

Description

   This command repurposes package-lock.json into a publishable
   npm-shrinkwrap.json or simply creates a new one. The file created and
   updated by this command will then take precedence over any other exist?
   ing or future package-lock.json files. For a detailed explanation of
   the design and purpose of package locks in npm, see npm help pack?
   age-lock-json.
