Red Hat Enterprise Linux Release 9.2 Manual Pages on 'npm-unstar.1' command

$ man npm-unstar.1

NPM-UNSTAR(1)   NPM-UNSTAR(1)

NAME

    npm-unstar - Remove an item from your favorite packages

  Synopsis

    npm unstar [<package-spec>...]

    Note: This command is unaware of workspaces.

  Description

    "Unstarring" a package is the opposite of npm help star, it removes an

    item from your list of favorite packages.

  More

    There's also these extra commands to help you manage your favorite

    packages:

  Star

    You can "star" a package using npm help star

  Listing stars

    You can see all your starred packages using npm help stars

  Configuration

  registry

    ? Default: "https://registry.npmjs.org/"

    ? Type: URL

    The base URL of the npm registry.

  unicode

    ? Default: false on windows, true on mac/unix systems with a unicode

locale, as defined by the LC_ALL, LC_CTYPE, or LANG environment vari‐

ables.

? Type: Boolean

When set to true, npm uses unicode characters in the tree output. When

false, it uses ascii characters instead of unicode glyphs.

otp

? Default: null

? Type: null or String

This is a one-time password from a two-factor authenticator. It's

needed when publishing or changing package permissions with npm access.

If not set, and a registry response fails with a challenge for a

one-time password, npm will prompt on the command line for one.
