## **Red Hat Enterprise Linux Release 9.2 Manual Pages on 'nvme-delete-ns.1' command**

**\$ man nvme-delete-ns.1**

NVME-ID-NS(1)                      NVMe Manual                      NVME-ID-NS(1)

### NAME

nvme-delete-ns - Send NVMe Namespace Management delete namespace command, return result.

### SYNOPSIS

nvme delete-ns <device> [--namespace-id=<nsid> | -n <nsid>]

### DESCRIPTION

For the NVMe device given, sends an nvme namespace management command to delete the requested namespace and provides the result.

The <device> parameter is mandatory and may be either the NVMe character device (ex: /dev/nvme0), or a namespace block device (ex: /dev/nvme0n1). The '--namespace-id' option is mandatory.

### OPTIONS

-n <nsid>, --namespace-id=<nsid>

The namespace identifier to delete.

### EXAMPLES

No examples yet.

### NVME

Part of the nvme-user suite
