\$ man nvme-micron-pcie-stats.1

NVME-MICRON-PCIE-(1) NVMe Manual NVME-MICRON-PCIE-(1)

NAME

nvme-micron-pcie-stats - Retrieves pcie error statistics for given
micron device

SYNOPSIS

nvme micron vs-pcie-stats <device>

DESCRIPTION

This command prints pcie correctable and uncorrectable error
information for the given micron device.

The <device> parameter is mandatory and may be either the NVMe
character device (ex: /dev/nvme0), or a namespace block device (ex:
/dev/nvme0n1).

This will only work on Micron devices devices of model numbers 54XX.

Support for new devices may be added subsequently.

OPTIONS

None

EXAMPLES

? Retrieve PCIe error information

```
# nvme micron vs-pcie-stats /dev/nvme0
```

NVME

Part of the nvme-user suite
