## **Red Hat Enterprise Linux Release 9.2 Manual Pages on 'nvme-seagate-vs-fw-activate-history.1' command**

**\$ man nvme-seagate-vs-fw-activate-history.1**

NVME-SEAGATE-VS-F(1)          NVMe Manual          NVME-SEAGATE-VS-F(1)

### NAME

nvme-seagate-vs-fw-activate-history - Retrieve Seagate vendor specific  
Controller-Initiated Telemetry in binary

### SYNOPSIS

nvme seagate vs-fw-activate-history <device> [OPTIONS]

### DESCRIPTION

This command will only work on Seagate devices supporting this feature.

Not all commands work across all product families.

The <device> may be either an NVMe character device (ex: /dev/nvme0) or  
an nvme block device (ex: /dev/nvme0n1).

### OPTIONS

-n <NUM>, --namespace-id=<NUM>

Desired namespace

-f <FILE>, --dump-file=<FILE>

Dump file

### EXAMPLES

Get the Seagate vendor specific Controller-Initiated telemetry log for  
the specified device.

```
# nvme seagate vs-fw-activate-history /dev/nvme0
```

### NVME

Part of the nvme-user suite
