## **Red Hat Enterprise Linux Release 9.2 Manual Pages on 'nvme-show-hostnqn.1' command**

**\$ man nvme-show-hostnqn.1**

NVME-SHOW-HOSTNQN(1)      NVMe Manual      NVME-SHOW-HOSTNQN(1)

### NAME

nvme-show-hostnqn - Generate a host NVMe Qualified Name

### SYNOPSIS

nvme show-hostnqn

### DESCRIPTION

Show the host NQN configured for the system. If /etc/nvme/hostnqn is not present and systemd application-specific machine IDs are available, this will show the systemd-generated host NQN for the system.

### OPTIONS

No options needed

### EXAMPLES

nvme show-hostnqn

### NVME

Part of the nvme-user suite
