Red Hat Enterprise Linux Release 9.2 Manual Pages on 'nvme-supported-log-pages.1' command

\$ man nvme-supported-log-pages.1

NVME-SUPPORTED-LOG(1) NVMe Manual NVME-SUPPORTED-LOG(1)

NAME

nvme-supported-log-pages - Send NVMe Supported Log pages request,
returns result and log

SYNOPSIS

```
nvme supported-log-pages <device> [--output-format=<fmt> | -o <fmt>]
                               [--human-readable | -H]
```

DESCRIPTION

Retrieves the NVMe supported log pages details from an NVMe device and provides the returned structure.

The <device> parameter is mandatory and should be the NVMe character device (ex: /dev/nvme0).

On success, the returned supported log pages log structure will be printed for each command that is supported.

OPTIONS

-o <format>, --output-format=<format>

This option will set the reporting format to normal, json, or binary. Only one output format can be used at a time.

-H, --human-readable

This option will parse and format many of the bit fields into a human-readable format.

EXAMPLES

No examples provided yet.
