NAME

   nvme-wdc-clear-pcie-correctable-errors - Clears the pcie correctable

   errors field returned in the smart-log-add command.

SYNOPSIS

   nvme wdc clear-pcie-correctable-errors <device>

DESCRIPTION

   For the NVMe device given, sends the wdc vendor unique clear pcie

   correctable errors command.

   The <device> parameter is mandatory and may be either the NVMe

   character device (ex: /dev/nvme0), or a namespace block device (ex:

   /dev/nvme0n1).

   This will only work on WDC devices supporting this feature. Results for

   any other device are undefined.
