Red Hat Enterprise Linux Release 9.2 Manual Pages on 'ostree-admin-config-diff.1' command

$ man ostree-admin-config-diff.1

OSTREE ADMIN CONFIG()   OSTREE ADMIN CONFIG()

NAME

    ostree-admin-config-diff - Diff current /etc configuration versus

    default

SYNOPSIS

    ostree admin config-diff [OPTIONS...]

DESCRIPTION

    Prints the differences between the current /etc directory and the

    default configuration in /usr/etc. Newly added files (present in /etc

    but not in /usr/etc) will be prefixed with 'A'. Modified files will be

    prefixed with 'M', and deleted files with 'D'.

OPTIONS

    --os="STATEROOT"

      Use a different operating system stateroot than the current one.

EXAMPLE

    $ ostree admin config-diff

        M   shadow

A   example.txt
