$ man ostree-admin-init-fs.1

OSTREE ADMIN INIT-F(1)   ostree admin init-fs   OSTREE ADMIN INIT-F(1)

NAME

    ostree-admin-init-fs - Initialize a new root filesystem

SYNOPSIS

    ostree admin init-fs [OPTIONS...] {PATH}

DESCRIPTION

    Initialize an empty physical root filesystem in the designated PATH,

    with normal toplevels and correct permissions for each directory.

    Primarily useful for operating system installers.

EXAMPLE

    $ mkdir /example

    $ ostree admin init-fs /example

    $ ls /example

    boot dev home ostree proc root run sys tmp
