

Red Hat Enterprise Linux Release 9.2 Manual Pages on 'ostree-admin-set-origin.1' command

\$ man ostree-admin-set-origin.1

OSTREE ADMIN SET-OR(1) ostree admin set-origin OSTREE ADMIN SET-OR(1)

NAME

ostree-admin-set-origin - Change the "origin" (location for upgrades)

SYNOPSIS

ostree admin set-origin {REMOTENAME} {URL} [BRANCH]

DESCRIPTION

Add a new remote named REMOTENAME (if it does not already exist). Then change the origin file for the current deployment. This is the ref that will be "tracked" and upgraded with ostree admin upgrade.

OPTIONS

--set=KEY=VALUE

Set an option for the remote.

--index=INDEX

Change the origin of the deployment numbered INDEX (starting from 0).

EXAMPLE
