## ***Red Hat Enterprise Linux Release 9.2 Manual Pages on 'ostree-admin-switch.1' command***

***\$ man ostree-admin-switch.1***

OSTREE ADMIN SWITCH(1)    ostree admin switch    OSTREE ADMIN SWITCH(1)

### NAME

ostree-admin-switch - Construct new tree from current origin and deploy it, if it changed

### SYNOPSIS

ostree admin switch {REF}

### DESCRIPTION

Choose a different REF from the current remote to track. This is the ref that will be "tracked" and upgraded with ostree admin upgrade. Like an upgrade, the operating system state will be preserved.

### OPTIONS

--os="STATEROOT"

Use a different operating system root than the current one.

### EXAMPLE

\$ ostree admin switch fedostree/20/workstation/gnome/core

OSTree

OSTREE ADMIN SWITCH(1)
