Red Hat Enterprise Linux Release 9.2 Manual Pages on 'ostree-admin.1' command

\$ man ostree-admin.1

OSTREE ADMIN(1) ostree admin OSTREE ADMIN(1)

NAME

ostree-admin - Use one of the ostree admin commands

SYNOPSIS

ostree admin {SUBCOMMAND}

DESCRIPTION

Use ostree admin subcommands.

SUBCOMMANDS

- ? cleanup
- ? config-diff
- ? deploy
- ? init-fs
- ? instutil
- ? os-init
- ? pin
- ? set-origin
- ? status
- ? switch
- ? undeploy
- ? unlock
- ? upgrade

View manpages for each admin subcommand using, for example:

\$ man ostree-admin cleanup

OPTIONS

--help, -h

Usage help

--sysroot="PATH"

Creates a new OSTree sysroot at PATH

--print-current-dir

Prints the full path to the deployment directory for the currently active deployment in the specified sysroot to standard out. This is incompatible with specifying a subcommand.
