Red Hat Enterprise Linux Release 9.2 Manual Pages on 'ostree-export.1' command

$ man ostree-export.1

OSTREE EXPORT(1)   ostree export   OSTREE EXPORT(1)

NAME

    ostree-export - Generate a tar archive from an OSTree commit

SYNOPSIS

    ostree export [OPTIONS...] {BRANCH}

DESCRIPTION

    This command generates a GNU tar formatted archive from an OSTree

    commit. This is useful for cases like backups, converting OSTree

    commits into Docker images, and the like.

EXAMPLE

    $ ostree export exampleos/x86_64/standard | gzip >

    exampleos-standard.tar.gz

OSTree   OSTREE EXPORT(1)
