## Red Hat Enterprise Linux Release 9.2 Manual Pages on 'ostree-trivial-httpd.1' command

### $ man ostree-trivial-httpd.1

OSTREE TRIVIAL-HTTP(1)      ostree trivial-httpd      OSTREE TRIVIAL-HTTP(1)

NAME

    ostree-trivial-httpd - Simple webserver

SYNOPSIS

    ostree trivial-httpd [OPTIONS...] [DIR]

DESCRIPTION

    This runs a simple webserver and keeps it running until killed. If DIR

    is not specified, it defaults to the current directory.

OPTIONS

    --daemonize,-d

        Fork into background when ready.

    --autoexit

        Automatically exit when directory is deleted.

    --port-file,-p="PATH"

        Write port number to PATH (- for standard output).

    --port,-P

Use the specified TCP port to listen on.

--force-range-requests

Force range requests by only serving half of files.

EXAMPLE

$ ostree trivial-httpd

OSTree                                    OSTREE TRIVIAL-HTTP(1)
