Red Hat Enterprise Linux Release 9.2 Manual Pages on 'pam_postgresok.8' command

$ man pam_postgresok.8

pam_postgresok(8)   System Administrator's Manual   pam_postgresok(8)

NAME

    pam_postgresok - simple check of real UID and corresponding account

    name

SYNOPSIS

    auth sufficient pam_postgresok.so

DESCRIPTION

    pam_postgresok.so is designed to check that the real UID of the calling

    process belongs to the "postgres" user and equal to 26 (the value as?

    signed to that user on Red Hat Linux systems).

ARGUMENTS

    debug Enable module debugging. The module will log its progress to

        syslog.

BUGS

    Let's hope not, but if you find any, please report them via the "Bug

    Track" link at http://bugzilla.redhat.com/bugzilla/

FILES

/usr/share/doc/setup-*/uidgid
