Red Hat Enterprise Linux Release 9.2 Manual Pages on 'pifconfig.8' command

$ man pifconfig.8

PIFCONFIG(8)   PIFCONFIG(8)

NAME

   pifconfig - display information about a network interface

SYNOPSIS

   pifconfig [INTERFACE [INTERFACE [INTERFACE] ...]]

DESCRIPTION

   This script mimic ifconfig behavior, but is written purely in python

   and python module ethtool.

OPTIONS

   INTERFACE

      Display information about only the listed interfaces. If no

      interface is given all interfaces are displayed.

   -h, --help

      Show help message and exit.

SEE ALSO

   ifconfig(8)
