Red Hat Enterprise Linux Release 9.2 Manual Pages on 'pklocalauthority.8' command

$ man pklocalauthority.8

PKLOCALAUTHORITY(8)   pklocalauthority   PKLOCALAUTHORITY(8)

NAME

   pklocalauthority - polkit Local Authority Compatibility

DESCRIPTION

   The polkit Local Authority no longer exists. Existing configuration

   files are honored; see pkla-admin-identities(8) and pkla-check-

   authorization(8) for description of the configuration format.

   Unlike the original Local Authority implementation, ReturnValue keys

   are ignored because polkit(8) no longer supports the functionality.
