Red Hat Enterprise Linux Release 9.2 Manual Pages on 'podman-pod-unpause.1' command

\$ man podman-pod-unpause.1

podman-pod-unpause(1) General Commands Manual podman-pod-unpause(1)

NAME

podman-pod-unpause - Unpause one or more pods

SYNOPSIS

podman pod unpause [options] pod ...

DESCRIPTION

Unpauses all the paused processes in the containers of one or more pods. You may use pod IDs or names as input.

OPTIONS

--all, -a

Unpause all pods.

--latest, -l

Instead of providing the pod name or ID, unpause the last created pod.

(This option is not available with the remote Podman client, including Mac and Windows (excluding WSL2) machines)

EXAMPLE

Unpause pod with a given name

```
podman pod unpause mywebserverpod
```

Unpause pod with a given ID

```
podman pod unpause 860a4b23
```
