Red Hat Enterprise Linux Release 9.2 Manual Pages on 'postlogin.5' command

$ man postlogin.5

POSTLOGIN(5)   Linux-PAM Manual   POSTLOGIN(5)

NAME

    postlogin - Common configuration file for PAMified services

SYNOPSIS

    /etc/pam.d/postlogin

DESCRIPTION

    The purpose of this PAM configuration file is to provide a common place

    for all PAM modules which should be called after the stack configured

    in system-auth or the other common PAM configuration files.

    The postlogin configuration file is included from all individual ser?

    vice configuration files that provide login service with shell or file

    access.

NOTES

    The modules in the postlogin configuration file are executed regardless

    of the success or failure of the modules in the system-auth configura?

    tion file.

BUGS

Sometimes it would be useful to be able to skip the postlogin modules in case the substack of the system-auth modules failed. Unfortunately the current Linux-PAM library does not provide any way how to achieve this.
