## ***Red Hat Enterprise Linux Release 9.2 Manual Pages on 'pw-mididump.1' command***

### ***\$ man pw-mididump.1***

PW-MIDIDUMP(1)      General Commands Manual      PW-MIDIDUMP(1)

#### NAME

pw-mididump - The PipeWire MIDI dump

#### SYNOPSIS

pw-mididump [options] [FILE]

#### DESCRIPTION

Dump MIDI messages to stdout.

When a MIDI file is given, the events inside the file are printed.

When no file is given, pw-mididump creates a PipeWire MIDI input stream and will print all MIDI events received on the port to stdout.

#### OPTIONS

-r | --remote=NAME

The name the remote instance to monitor. If left unspecified, a connection is made to the default PipeWire instance.

-h | --help

Show help.

--version

Show version information.

#### AUTHORS

The PipeWire Developers <?

<https://gitlab.freedesktop.org/pipewire/pipewire/issues>; PipeWire is available from <https://pipewire.org>
