Red Hat Enterprise Linux Release 9.2 Manual Pages on 'rev.1' command

\$ man rev.1

REV(1) User Commands REV(1)

NAME

rev - reverse lines characterwise

SYNOPSIS

rev [option] [file...]

DESCRIPTION

The rev utility copies the specified files to standard output, reversing the order of characters in every line. If no files are specified, standard input is read.

This utility is a line-oriented tool and it uses in-memory allocated buffer for a whole wide-char line. If the input file is huge and without line breaks than allocate the memory for the file may be unsuccessful.

OPTIONS

-V, --version

Display version information and exit.

-h, --help

Display help text and exit.
