Red Hat Enterprise Linux Release 9.2 Manual Pages on 'routel.8' command

\$ man routel.8

ROUTE(8) Linux ROUTEL(8)

NAME

routel - list routes with pretty output format

SYNOPSIS

```
routel [ OPTIONS ] [ tablernr [ ip route options... ] ]  
OPTIONS := { -h | --help | [{-f | --family } {inet | inet6 } | -4 | -6  
}
```

DESCRIPTION

The routel script will list routes in a format that some might consider easier to interpret than the ip route list equivalent.

AUTHORS

Rewritten by Stephen Hemminger <stephen@networkplumber.org>.

Original script by Stephen R. van den Berg <srb@cuci.nl>.

This manual page was written by Andreas Henriksson <andreas@fatal.se>, for the Debian GNU/Linux system.
