## ***Red Hat Enterprise Linux Release 9.2 Manual Pages on 'rpc.5' command***

**\$ man rpc.5**

RPC(5)                   Linux Programmer's Manual                   RPC(5)

NAME

rpc - RPC program number data base

SYNOPSIS

/etc/rpc

DESCRIPTION

The rpc file contains user readable names that can be used in place of RPC program numbers. Each line has the following information:

- ? name of server for the RPC program
- ? RPC program number
- ? aliases

Items are separated by any number of blanks and/or tab characters. A '#' indicates the beginning of a comment; characters from the '#' to the end of the line are not interpreted by routines which search the file.

Here is an example of the /etc/rpc file from the Sun RPC Source distribution.

```
