sane-hpljm1005(5)   SANE Scanner Access Now Easy   sane-hpljm1005(5)

NAME

    sane-hpljm1005 - SANE backend for Hewlett-Packard LaserJet M1005 MFP

    Scanner

DESCRIPTION

    The sane-hpljm1005 library implements a SANE (Scanner Access Now Easy)

    backend that provides access to the following Hewlett-Packard scanner:

        LaserJet M1005

    If you own a scanner other than the ones listed above that works with

    this backend, please let us know this by sending the scanner's exact

    model name and the USB vendor and device ids (e.g. from

    /proc/bus/usb/devices, sane-find-scanner(1) or syslog) to us. Even if

    the scanner's name is only slightly different from the models mentioned

    above, please let us know.

CONFIGURATION

    None required.

FILES

    /usr/lib64/sane/libsane-hpljm1005.a

        The static library implementing this backend.

    /usr/lib64/sane/libsane-hpljm1005.so

        The shared library implementing this backend (present on systems

        that support dynamic loading).

ENVIRONMENT

SANE_DEBUG_HPLJM1005

      If the library was compiled with debug support enabled, this en?

      vironment variable controls the debug level for this backend.

      Higher debug levels increase the verbosity of the output.

      There is not currently a great deal of diagnostic output, it be?

      ing mainly confined to error conditions.
