Red Hat Enterprise Linux Release 9.2 Manual Pages on 'scsi_temperature.8' command

$ man scsi_temperature.8

SCSI_TEMPERATURE(8)   SG3_UTILS   SCSI_TEMPERATURE(8)

NAME

    scsi_temperature - fetch the temperature of a SCSI device

SYNOPSIS

    scsi_temperature [--help] [--verbose] DEVICE [DEVICE]*

DESCRIPTION

    This bash shell script calls the sg_logs utility on each given DEVICE

    in order to find the device's temperature. The Temperature log page is

    checked first and if it is not available then the Informational Excep?

    tions log page is checked.

OPTIONS

    Arguments to long options are mandatory for short options as well.

    -h, --help

        print out the usage message then exit.

    -v, --verbose

        increase level or verbosity.

EXIT STATUS

    The exit status of this script is 0 when it is successful. Otherwise

    the exit status is that of the last sg_logs utility called. See the

    sg3_utils(8) man page.
